## **DETAILED ACTION**

### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

Please cancel claim 26.

### ***Election/Restrictions***

2. Claims 1, 28, and 52 are generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 7-9, 29, and 55-56, directed to the species of groups II - IV no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

3. This application is in condition for allowance except for the presence of claim 26 directed to a species non-elected without traverse. Accordingly, claim 26 has been cancelled.

### ***Allowable Subject Matter***

4. Claims 1-9, 11-17, 28, 29, 31, 52-56, and 61-64 are allowed.

5. The following is an examiner's statement of reasons for allowance:

In regard to claims 1-9, 11-17, 61, and 64, the prior art does not disclose a cover for an image sensor comprising the combination of limitation specified by the claimed invention, specifically the limitations of:

“said plate having a plurality of surfaces forming a lensing structure, such that at least one of said plurality of surfaces is contoured into a lensing surface capable of changing imaging characteristics; and

a mounting structure extending from an upper surface of the plate and adapted to secure a prefabricated lens system to the plate above the lensing structure” as stated in claim 1.

In regard to claims 28, 29, 31, and 62, the prior art does not disclose the method making an image sensor having a cover plate comprising the combination of limitation specified by the claimed invention, specifically the limitations of:

“forming a lensing structure on a lensing surface of a flat substantially transparent cover plate by contouring said lensing surface of the cover plate into a lensing element to form a lensing cover plate;

securing a mounting structure to an upper surface of the plate, said mounting structure being adapted to connect a prefabricated lens system to the plate above the lensing structure” as stated in claim 28.

In regard to claims 52-56 and 63, the prior art does not disclose the method making an a camera system having a cover plate comprising the combination of limitation specified by the claimed invention, specifically the limitations of:

“contouring a portion of a cover plate into a lensing element to form a cover plate having a lensing structure;

securing a mounting structure to an upper surface of the plate, said mounting structure being adapted to connect a prefabricated lens system to the plate above the lensing structure” as stated in claim 52.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
